

BHARATH RAJ NAGOOR KANI

✉ bharathrajn98@gmail.com •  [GitHub](#) •  [Google Scholar](#) •  [bharathrajn.com](#)

Education

Cornell University

Ph.D. in Computer Science

Advisor: Prof. Noah Snavely

Aug 2024 – Present

Carnegie Mellon University

M.S. in Robotics

Advisor: Prof. Shubham Tulsiani

Aug 2022 – May 2024

Sri Sivasubramaniya Nadar College of Engineering

B.E. in Electronics and Communication Engineering

Affiliated to Anna University

June 2015 – Apr 2019

Experience

Google DeepMind

Student Researcher

May 2025 – Aug 2025

Explored using 3D reconstruction transformers and video generative models for motion blur and defocus blur removal.

Intel Corporation

Research Scientist Intern

May 2024 – Aug 2024

Explored memory efficient learning based 3D representations for real-time rendering.

Siemens Digital Industries Software

Engineering Services Engineer

Jan 2022 – July 2022

Associate Engineering Services Engineer

May 2019 – Jan 2022

Built models, algorithms and systems for myriad autonomous driving projects. (see projects section for more details)

Publications

[4] G3T Up! Gravity Aligned Coordinate Frames Simplify Pointmap Processing.

Bharath Raj Nagoor Kani, Noah Snavely

arXiv 2026

[\[Project\]](#) / [\[Paper\]](#) / [\[Code\]](#)

Shows that anchoring predictions to gravity removes a key ambiguity in pointmap-based 3D reconstruction, improving accuracy across several downstream tasks.

[3] Flat-Pack Bench: Evaluating Spatio-Temporal Understanding in Large Vision-Language Models through Furniture Assembly.

Aditya Chetan, Eric Cai, Peeyush Kushwaha, Bharath Raj Nagoor Kani, Utkarsh Mall, Qianqian Wang, Noah Snavely, Bharath Hariharan

CVPR 2026

[\[Project\]](#) / [\[Paper\]](#) / [\[Code\]](#)

Proposes a benchmark that uses multi-step furniture assembly to test whether vision-language models can reason jointly across space and time.

[2] UpFusion: Novel View Diffusion from Unposed Sparse View Observations.

Bharath Raj Nagoor Kani, Hsin-Ying Lee, Sergey Tulyakov, Shubham Tulsiani

ECCV 2024

[\[Project\]](#) / [\[Paper\]](#) / [\[Code\]](#)

Synthesizes novel views and infers 3D representations of an object from a sparse set of reference images *without* corresponding pose information.

[1] Single Image Haze Removal Using a Generative Adversarial Network.

Bharath Raj N., Venkateswaran N.

WiSPNET 2020

[\[Paper\]](#) / [\[Code\]](#)

Proposes a conditional GAN based architecture to remove haze from images.

Projects

Progressive Photon Mapping

Implemented Progressive Photon Mapping in C++ for the Physics-based Rendering course (15-668) at CMU by extending the renderer to handle light paths of type $L(S^+)D(S^+)$ for caustic effects. [\[Report\]](#)

Open Source Contributions to Kornia

Contributed enhancements and fixes to Kornia, an open source differentiable computer vision library for PyTorch, including a Direct Linear Transform (DLT) based Perspective-n-Point (PnP) solver.

Autonomous Driving Projects at Siemens

- **Ego-Lane Estimation & ROS Perception Toolchain:** Leveraged 3D geometry, machine learning and state estimation to build a fast, robust ego-lane estimation and tracking system, and implemented core components of a ROS-based perception toolchain.
- **Generative Vehicle Trajectory Prediction:** Researched generative adversarial networks with a structured latent space for predicting future ego-vehicle trajectories.
- **Maximum Entropy Inverse RL:** Implemented maximum entropy inverse reinforcement learning algorithms to model highway driving styles from expert demonstrations.

Teaching & Service

Mentoring

- | | |
|--|---------------------|
| • Bowers Undergraduate Research Experience , Cornell University | May 2026 – Present |
| • Undergraduate AI Mentoring Program , Carnegie Mellon University | Oct 2023 – May 2024 |
| • Google Code-In Mentor , CloudCV | Oct 2018 – Dec 2018 |

Reviewing

- CVPR (2024–2026), ECCV/ICCV (2024–2026)

Graduate Teaching Assistant

- | | |
|--|-------------|
| • CS 5670: Introduction to Computer Vision , Cornell Tech | Fall 2025 |
| • 16-825: Learning for 3D Vision , Carnegie Mellon University | Spring 2024 |

Honors & Awards

Outstanding Reviewer, ECCV	2026
----------------------------	------

Hackathon Awards

- | | |
|--|----------|
| • People’s Choice Award , Yet Another Hackathon, SVCE | Aug 2018 |
| • Runner Up , AWS Deep Learning Hackathon, IIT Madras | Jan 2018 |
